

Certificate of origin

In an increasingly internationalized world, there is an increasing focus on the origin of goods that cross national borders. In the past, freight forwarders have been happy to issue EUR1, after authorization, on behalf of their customers who have had the need for this.

NTEX now wants our customers to issue this themselves, as errors in Certificates of origin can have major consequences for all parties.

Certificates of origin can be issued in several different ways. The simplest form is by having a **signed declaration on the commercial invoice**. For values up to NOK 65,000, - this serves as proof of origin in most countries.

Example:

Eksportøren av produktene omfattet av dette dokument erklærer at disse produktene, unntatt hvor annet er tydelig angitt, har ... preferanseopprinnelse.

The exporter of the products covered by this document declares that, except where otherwise clearly indicated, these products are of ... preferential origin.

.....
(Place and date)

.....
(Signature of the exporter; and name in printed letters)

For higher values, this must be extended with authorization for an approved exporter. If you have several high-value exports throughout the year, this is the best solution. You can apply to become an approved exporter at:

[Approved Exporters - Norwegian Customs \(toll.no\)](http://toll.no)

Eksportøren av produktene omfattet av dette dokument (tollmyndighetens autorisasjons nummer) erklærer at disse produktene, unntatt hvor annet er tydelig angitt, har ... preferanseopprinnelse.

The exporter of the products covered by this document (customs authorizations number) declares that, except where otherwise clearly indicated, these products are of ... preferential origin.

.....
(Place and date)

.....
(Signature of the exporter; and name in printed letters)

If, on the other hand, you have few exports, but with a high value, and to several states in the east, it is still EUR1 that applies. This you now issue yourself in Altinn for each individual shipment.

[Altinn - Varesertifikat EUR.1](http://altinn.no)
