Information ICS2 2026

What is ICS2?

ICS2 is a IT system developed to collect data on all goods entering the EU before they arrive. Economic operators must submit safety and security information to ICS2 through an Entry Summary Declaration (ENS).

The purpose of the system is to strengthen the protection of the EU's internal market and its citizens through new customs-related security measures. At the same time, it aims to facilitate free trade through improved, data-driven security processes that reflect today's global business models.

ICS2 Fee (imports into the EU)

Fees:

- For transports where NTEX provides the export declaration:
  Total fee: 450 SEK (export declaration including ICS2)

- For transports where NTEX does *not* provide the export declaration:
  Fee for ICS2 only: 275 SEK
